### **Inverter system with Pulse Width Modulation**

This industry-leading system produces high-quality, clean electricity. Its pure sine wave is as clean or cleaner than commercial power, making it suitable for products with built-in microcomputers.

### **Smart Throttle™ load-sensing throttle control**

This intelligent system automatically adjusts engine speed to precisely match load - resulting in greater fuel efficiency and noise reduction.

### **Oil warning system**

To prevent engine damage and costly repairs, and enhance long-term durability, the generator automatically shuts off when oil begins to run low. It cannot be re-started until oil is added.

### **TwinTech™ capability**

Connect two EF2000iS's for 3600 watts of maximum power (requires accessory cable available at extra cost).
